

MUD HOPPERS

MUD HOPPERS

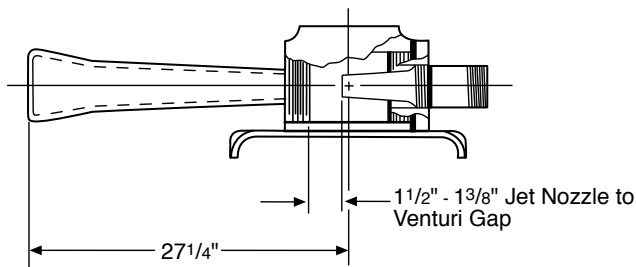

BHDE Mud Hoppers, available in 4" and 6" sizes, allow high volume, low pressure mud mixing. All mud hoppers are equipped with a throttling butterfly valve between the hopper and tee assembly to allow precise mixing of solids with the medium.

MUD HOPPERS

DESCRIPTION	4"		6"	
	PART NO.	WT. LBS.	PART NO.	WT. LBS.
Hopper Assembly	K9000V	186	K9050	236
Jet Nipple	210175	9	312200	17.5

OPERATIONAL DATA

HOPPER SIZE	4"	6"
Pressure	40-60 psi	40-60 psi
Volume – Mud	110-140 GPM	1100-1400 GPM
Volume – Bulk Solids	100 lb./min.	600 lb./min.
Jet Nipple Bore	3/4"	2"
Weight Lbs.	186	236

VENTURI

The BHDE Venturi, when used in conjunction with the 6" BHDE Mud Hopper, maximizes the mixing efficiency of the hopper, thereby allowing increased mixing rates. Additionally, the Venturi more efficiently recovers upstream mud-line pressure.

VENTURI

DESCRIPTION	WT. LBS.	PART NO.
Venturi – 6"	51	K9051
Venturi – 4"	15	L904VT
