

# MUD GUNS

## BOTTOM TYPE MUD GUN

BHDE Bottom Type Mud Guns are designed for submerged service in steel pits and are available in the following sizes: 2", 3", and 4". The 2" is a high pressure gun, while the 3" and 4" sizes are for low pressure, high volume service such as in mud mixing systems employing centrifugal pumps.

All mud guns are equipped with handles and swivel joints as illustrated, permitting 360° rotation. Length "A" (in the illustration) should, in all instances, be specified when ordering.

### HOW TO ORDER
